

NONIN Disposable Cloth Sensors

Nonin's 6000 Cloth Series pulse oximetry disposable sensors provide the ultimate comfort for patients requiring extended SpO₂ and pulse rate monitoring and secure placement. The sensor design features a stretch, tear-resistant cloth for easier placement and fit on the patient, especially for hard-to-fit patients such as infants and neonates, ensuring consistent readings by keeping the sensor in the proper position. The 6000C Series disposable sensors with trusted PureLight® technology, combined with Nonin's PureSAT® signal processing, provide consistent results – patient to patient and sensor to sensor, even under challenging patient conditions such as motion and low perfusion.

- Cloth material – Breathable for patient comfort
- Stretch material – Easy placement and fit; keeps sensor in proper position
- Tear resistant – Increases the number of times the sensor can be repositioned
- Available in a variety of sizes – Adult to neonate
- Latex free, DEHP and BPA free
- All-inclusive design with illustrated finger guide assures easy and accurate placement for the caregiver or self-application by the patient
- Ideal for situations where risk of cross contamination is high.
- Special adhesive allows the sensor to be repositioned multiple times.
- PureLight® LEDs are meticulously selected based on a specified wavelength and light intensity. They are free of secondary emissions (contamination) and eliminate variations in readings from patient-to-patient and sensor-to-sensor.
- Meets all regulatory and quality requirements for pulse oximetry.

Available Models

Disposable Cloth Sensors

NON-6000CA	Disposable Adult Sensor(Cloth Single Use), 1 metre cable, 24Pk	NON-6000CI	Disposable Infant Sensor(Cloth Single Use), 1 metre cable, 24Pk
NON-6000CP	Disposable Paediatric Sensor(Cloth Single Use), 1 metre cable,24Pk	NON-6000CN	Disposable Neonate Sensor(Cloth Single Use), 1 metre cable, 24Pk
