

NONIN Reusable Soft Sensors

The Nonin soft sensor offers ultimate flexibility for SpO₂ monitoring – whether short term spot checking or continuous monitoring. The specially designed soft sensors offer superior patient comfort by providing an optimal distribution of pressure and three models to fit a variety of patient hands – children to adult. The Nonin soft sensors with trusted PureLight® technology, combined with Nonin's PureSAT® signal processing, provide consistent results – patient to patient and sensor to sensor, even under challenging patient conditions such as motion and low perfusion.

- Designed for ultimate comfort – short or longer term monitoring
- Available in 0.3m, 1m or 3m length cables
- Suitable for settings where SpO₂ monitoring is required
- Meets all required regulatory and quality standards
- Durable silicone material
- Latex free
- Added flexibility for a secure fit
